RESPONSE TO ELECTION OF SPECIES REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Official Action dated December 9, 2004, the following remarks are submitted.

The aforementioned Official Action indicates that the claims in this application are directed to three different species. As identified in the Official Action, the three species are as follows.

Species A pertaining to the first aspect described beginning on page 4 of the application.

Species B pertaining to the second aspect described beginning on page 10 of the application.

Species C pertaining to the third aspect described beginning on page 15 of the application.

Based on the Examiner's observation that the three species are patentably distinct from one another, an election of species requirement has been imposed requiring an election of one of the three species.

In response to the election of species requirement, applicants hereby elect, with traverse, species A described beginning on page 4 of the specification. Claims 1-14 are readable on that aspect of the invention.

The election is made with traverse because the three species identified in the Official Action are not three different species of the invention. That is, the first aspect described beginning on page 4 of the application, the second aspect described beginning on page 10 of the application and the third aspect described beginning on page 15 of the application do not constitute three different species of the electric parking brake apparatus. Rather, they merely summarize features associated with the disclosed electric parking brake apparatus according to different aspects of the invention.

The claims in this application define the disclosed embodiment of the electric parking brake apparatus in terms of different combinations and arrangements of features. The claims vary from one another in terms of breadth or scope, but are not directed to different species of the electric parking brake apparatus. Under the circumstances, and as generally discussed in § 806.03 of the Manual of Patent Examining Procedure, restriction is not proper.

In the event the Examiner continues to believe that an election of species requirement is appropriate here, the Examiner is kindly asked to explain the portions of the detailed description and the drawing figures describing the different "species" identified in the Official Action.

In light of the foregoing, withdrawal of the election of species requirement and examination of all of the claims of this application are respectfully requested.

Should any questions arise in connection with the application, the undersigned respectfully requests that he be contacted at the number indicated below.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
